SKETCH OF PROJECT

OVER 15 YEARS OF EXPERIENCE IN CENTRAL NEW YORK
A LEADER IN RESIDENTIAL & COMMERCIAL CONCRETE

DIG INFORMATION

*** PLEASE READ AND SIGN ***

- * Haskell Concrete recommends that the owner DOES NOT take the day off from work and wait for dig-outs. (delays, setbacks, or complications may occur, resulting in extra time needed.)
- * Often after dig out, the grade of the driveway or sidewalk, may be higher or lower than the lawn. Haskell Concrete is not responsible for any landscaping that may arise from this situation.
- * Haskell Concrete will use existing stone in the project if we deem it to be beneficial to the job.
- * If excessive rain or equipment problems arise, there may be a delay in our original book date. We will be in contact if problems occur.
- * In some cases, the digging process may take more than one day to complete.
- * If tree(s) or stump(s) impede concrete area and Haskell Concrete cannot remove - property owner will be responsible for hiring a tree service to remove, at their own expense.
- * After digging: Owner may drive on stone, unless it is blocked off.
- * The stone will be tamped and fine-tuned the day of pouring.
- * Concrete: If Haskell Concrete cannot remove existing concrete, the owner will be responsible for cost of jackhammer rental and additional labor costs. (Note: this problem is rare)
 - * Haskell Concrete will not be held responsible for damage to sidewalks, concrete, bricks, pipes, retaining walls, etc. that machines go over to do the job correctly and efficiently. Any damage will be a direct cost to the customer.
- * If concrete is found under homeowners driveway, additional charges may apply. Please notify the estimator of any knowledge of existing concrete under driveway, sidewalks or patios.
- * If you have any concerns or changes before or after digging, please call promptly.
- * Often times at garage floor, foundation problems exist. Haskell Concrete is not responsible for repairing foundations. Filling with stone will not fix problems and the driveway, sidewalks, garage floor, and patio may sink. Please call estimator as soon as possible.
- * Haskell concrete will notify home owner or property manager in advance before concrete installation date & time. There is a 5 to 7 day cure time on applied finished concrete. Estimator will go over everything.
- * Haskell Concrete will contact U.F.P.O. to mark your property's utilities. The homeowner is responsible for making Haskell Concrete aware of any drains, dog fences, wells, and/or septic systems (new or old) in concrete area, as well as and personally installed utilities BEFORE we excavate.
- * If you have very specific design issues you may meet with the dig our crew the day of digging to mark them out in paint. You may also go ahead and mark out the design in paint yourself for our crew to follow accordingly. You MUST notify our office if you are making changes to the design.
- * Any change made to design after dig-out crews have left: Minimum \$500 charge for additions.
- * Haskell Concrete shall not be held responsible for disputes of property lines. These issues should be resolved before any digging begins.
- * Once customer has approved dig-out for concrete, and concrete is completed - any alterations will be a direct cost to the customer/owner. Haskell Concrete recommends the customer ALWAYS contacts the town, village, city, to discuss permit requirements
- * If building permits are required, they shall be obtained and paid for by the home/property owner.
- * Haskell Concrete CAN NOT remove any city/town sidewalk or concrete gutter, without authorized written permission from the customer's township. If Haskell Concrete covers over a sidewalk per property owners request, Haskell Concrete will not be held responsible for any issues that result.
- * 50% of the estimated cost will be due upon completion of the dig-out. The remaining 50% of the estimated cost will be due upon completion of the concrete.
- * By signing this, the customer signature acknowledges agreement to be bound by terms & conditions attached.

STONE BASE: We have been in business since 2008. We have been very successful digging out with 3"-4" of stone, dirt and laying fabric paper when we deem necessary. However, if you feel you would like more stone, please call for additional pricing.

FABRIC PAPER: This is used as a buffer between the dirt underneath the new stone we lay down. It prevents the stone from sinking into the ground if it is soft. We will use this paper as needed. If you would like to use this paper under your whole project, no matter our recommendation, there will be an additional charge. *Fabric paper is an oversold promise and DOES NOT prevent your driveway from sinking, cracking or weed growth.

ADDITIONS ONLY: Haskell Concrete will try to go across lawns and stay off existing concrete when performing additions. We are not responsible for damage to your lawn or any landscaping that may arise. If we must go on the existing area to do the addition, Haskell Concrete is not responsible for any damage that occurs to existing driveways, sidewalks or patios.
