

# Do Not Approve Incentive Zoning for Collington Pointe East Development (Keep AR-40 Zoning)

The Town of Lysander is already densely populated enough. As residents of the Town of Lysander, we want to see new developments adhere to the current AR-40 zoning so that the minimum amount of houses will be built in future developments and open space will be preserved. This applies to the proposed Collington Point East Incentive zoning (45 lots, not 122) as well as future development plans such as for the development of the former Melvin Farm.

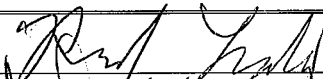

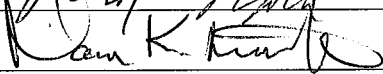

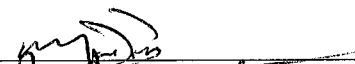

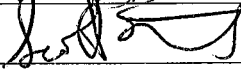

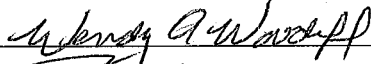

We the undersigned residents of the Town of Lysander state clearly that we do not want incentive zoning agreements for new developments on the Lysander Peninsula. Make builders adhere to the current AR-40 zoning.
